

Thinking about becoming a **member**?

For nearly a 150 years, the ANA has counted the world's leading academic neurologists among its members. In 2015, the association expanded its membership to include students and trainees in order to prepare the next generation of clinician-researchers for success.

Wherever you are in your professional journey, there's a place for you at ANA.

Our Mission

Advancing science, education, and careers to improve neurologic health for all.

ANA Keeps You in the Know

Be informed about what is happening across the spectrum of neurological research at the best institutions in the world.

- **Educational Opportunities**

- ANA Highlights Bite-Sized Learning
- ANA Investigates Podcast Series
- CME is available exclusively to ANA members for eligible activities through ANA's On Demand Education Center (OnDEC).

- **High-Impact Journals**

- *Annals of Neurology*
- *Annals of Clinical and Translational Neurology (ACTN)*
- InterACTN—online patient cases to sharpen your clinical skills through expert feedback and earn CME credits
- *Annals of the Child Neurology Society*

- **Networking**

Unparalleled Educational Opportunities

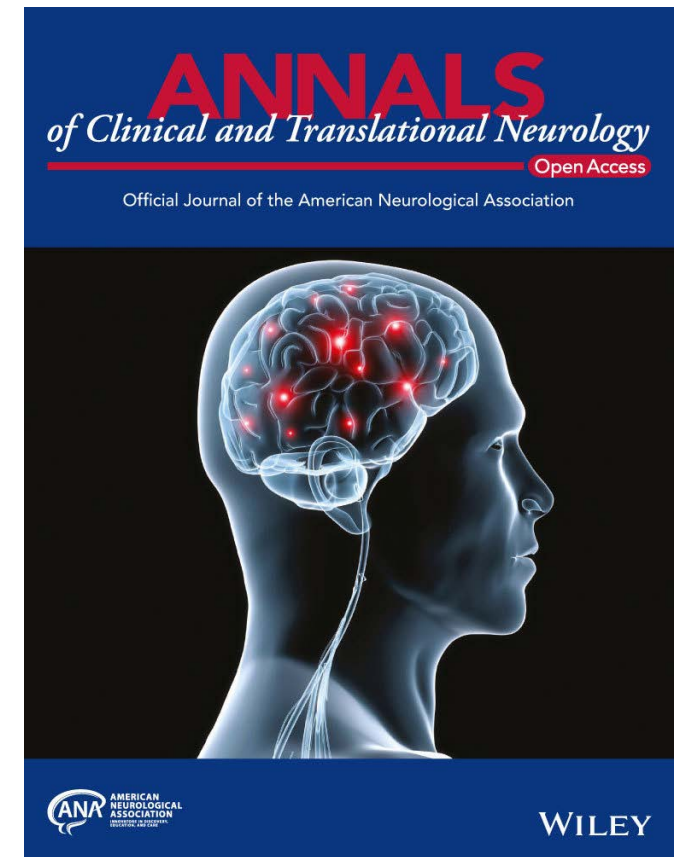

- ANA's On Demand Education Center (ANA OnDEC) allows you to earn *AMA PRA Category I Credit(s)*[™] anywhere, from any device for participating in eligible activities. ANA educational offerings include:

- Launched in 2020, [ANA Highlights](#) are short modules featuring guest lecturers speaking about hot topics in academic research, special initiatives, or novel conditions and treatments.
- Each month, during 15-20-minute [ANA Investigates](#) podcast episodes, ANA delves into a broad range of topics from the latest scientific advancements to the most pressing sociological issues impacting our work. You can subscribe to the podcast on Apple, Google, Spotify, or listen by logging onto MyANA.org.
- Annual Meeting Recordings: ANA members receive complimentary access to the ANA Meeting Recording Archive!

High-Impact Journals

- All members receive complimentary access to [Annals of Neurology](#) and the online [Annals of Clinical and Translational Neurology](#) (ACTN), as well as discounted rates for submitting articles to ACTN.
- As one of the most prestigious medical publications in the world, *Annals of Neurology* publishes high-impact clinical and basic research in neurology and neuroscience.
- *Annals of Clinical and Translational Neurology* is an online-only, open-access journal created to rapidly disseminate high-quality research related to all areas of neurology.

ANA Annual Meeting

- Groundbreaking science
- Career-advancing networking with thought leaders in neurology
- Professional Development Courses
- Interactive Workshops
- Special Interest Group Sessions

For nearly 150 years, academic neurologists and neuroscientists have connected over exciting research updates and best practices at the ANA Annual Meeting.

Additional Member Benefits for Students

Making Membership Affordable

- FREE annual membership – no dues!
- Significantly Reduced Annual Meeting Registration Fees

Encouraging Annual Meeting Participation

- Poster Awards
- Emerging Scholar Awards
- Travel Awards for Poster Presenters
- Dependent Care Travel Grant
- Junior & Early Career Reception
- Professional Development Courses

Career Development

- Committee Opportunities

Additional Member Benefits for Postdoctoral Fellows, Residents & Trainees

Making Membership Affordable

- \$50 annual membership dues
- Significantly Reduced Annual Meeting Registration Fees

Encouraging Annual Meeting Participation

- Travel Awards for Poster Presenters
- Dependent Care Travel Grant
- Junior & Early Career Reception
- ANA-AUPN Career Fair
- Professional Development Courses
- Research Careers Reimagined Course (RCR)

Awards

- Poster Awards
- Emerging Scholar Awards

Career Development

- International Outreach Travel Scholarship
- Committee Opportunities

Additional Member Benefits for Early Career Members

Awards & Lectureships

- Emerging Scholar Awards
- The Grass Foundation--ANA Award in Neuroscience
- Audrey S. Penn Lectureship

Grants & Scholarship Programs

- Travel Awards for Poster Presenters
- Dependent Care Travel Grant
- International Outreach Travel Scholarship

Career Development

- Board and Committee Opportunities
- Junior & Early Career Reception at the ANA Annual Meeting
- Professional Development Courses at the ANA Annual Meeting
- Research Careers Reimagined Course (RCR)

Additional Member Benefits for Associate Professors & Beyond

Awards & Lectureships

- Derek Denny-Brown Young Neurological Scholar Award
- Distinguished Neurology Teacher Award
- George W. Jacoby Award
- Raymond D. Adams Lectureship
- Soriano Lectureship
- Audrey S. Penn Lectureship

Career Development

- Board & Committee Opportunities
- Professional Development Courses at the ANA Annual Meeting

ANA Membership Makes a Difference

"By bringing together all of the researchers from the most prestigious universities around the country, the ANA provides a forum for extended collaboration and the exchange of ideas, and a place where academic neurologists can find like-minded colleagues who are engaged in the same research and the same battle to discover new therapies for neurological disease."

— Clifton L. Good, MD, Board Member, American Neurological Association, Professor and Chair, Neurology, Neuromuscular Medicine, University of South Florida

"It's really been fantastic to be in the ANA. I recall being a medical student, when I was in a laboratory getting my first taste of brain stimulation. My research mentor at the time was being inducted as a fellow of the ANA. I remember going to the meetings and thinking, 'This is where I want to be when I grow up,' and I am so excited that it came to fruition."

— Roy Hamilton, MD, MS
Associate Professor of Neurology
University of Pennsylvania

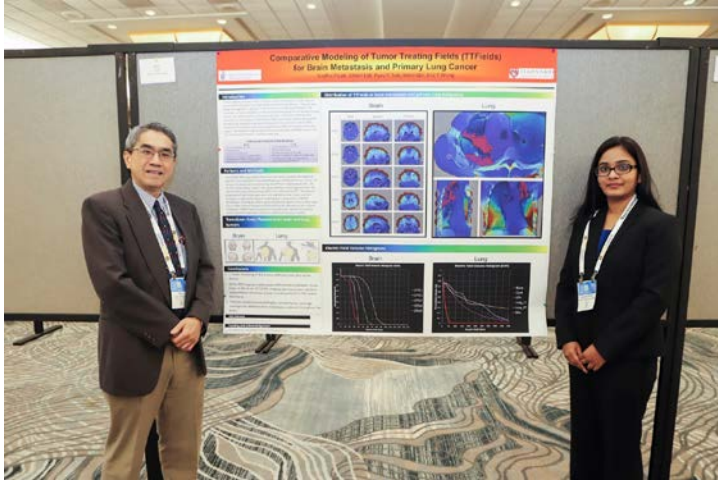

"The ANA has been vital for obtaining quality feedback on my research and developing new collaborations. I really enjoy the yearly meetings because they are interactive and just the right size for networking."

— Tiritia Yamasaki, MD, PhD
Assistant Professor of Neurology
University of Kentucky
